Fundraising – Jeff Anderson

- Proposed Clay shooting fund raising event to be held March 27, 2020. More details will be sent out to members after the first of the year.

Speaker – Brian Hoeft, Director, RTC FAST

- The RTC’s Freeway and Arterial System of Transportation (FAST) is designed to both monitor and control traffic. The traffic control component of the system consists of freeway and arterial management. Traffic control requires detection of traffic conditions through the use of video image detection and inductive loop detection. Visual verification of conditions is possible through closed-circuit television cameras. Traffic control is achieved through the use of traffic signals, ramp meters, dynamic message signs, and lane use control signals.
- Traffic in Las Vegas - RTC staff is responsible for two major areas that make up the FAST system:
  - the Arterial Management Section, which includes all arterial streets and roadways such as Eastern, Sahara, and Charleston;
  - and the Freeway Management Section, which includes the entire freeway network such as the 215 beltway, US-95, I-11 and I-15.
- ATSSA members were provided a tour of the FAST traffic management center.

Next Meeting: March 27, 2020 (in conjunction with shooting Clays event, Las Vegas, NV)
